

3. Define the Problem Statements

Date	30 September 2026
Team ID	SWTID-2026-8263
Project Name	Import Data Using Transform Maps (Spreadsheet)
Maximum Marks	2 Marks

Template description: Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Customer Problem Statement Template

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	an HR manager responsible for employee skill and training records	maintain accurate employee information in one centralized system	the information is often maintained or exchanged through spreadsheets and manual processes	manual handling makes it harder to keep records consistent, identify the correct employee, and maintain current information	concerned about errors, duplication, and time spent maintaining records
PS-2	an HR manager who needs employee information for reporting	import employee data and analyse it by department and location	raw employee data does not automatically provide a clear, secure reporting view	the team needs structured ServiceNow records, reliable matching, useful reports, and controlled access	concerned that useful information may be difficult to analyse or may be exposed to unauthorized users

Problem Definition

HR teams need a centralized ServiceNow Skill Wallet to manage employee skill/training information securely and consistently. The solution should support spreadsheet imports, accurate employee identification through Employee ID matching, structured employee information, analytics by department and location, and controlled access for authorized users.
